BODY AESTHETICS

# LIPOSUCTION

Liposuction is a popular application used to remove excess fat in certain parts of the body, such as the abdomen, waist, hips, legs, back, arms or neck. Liposuction also helps to shape these areas and improve their contours.

BODY AESTHETICS

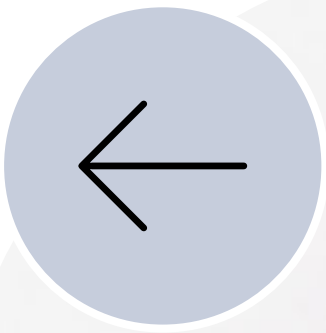

TUMMY TUCK

It is a surgical procedure in which excess fat and skin on the abdomen are removed, and the abdominal muscles that have weakened over time are repaired and supported in the midline. The aim is providing the individual with a smoother and flatter abdomen in this way.

BODY AESTHETICS

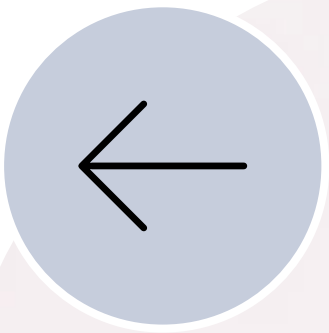

UPPER ARM AESTHETICS

Upper arm aesthetic operations are surgical operations that provide solutions to arm sagging, stretch marks, the back of the arms being larger or more swollen than the front, and fat accumulation in the armpit. The shape, and appearance of the arms can pose an important problem, especially in people who lose or gain a lot of weight. In addition, arm sagging can be seen in those who do not exercise a lot.

BODY AESTHETICS

# TIGHT LIFTING

Rapid weight gain and loss may cause sagging and loosening in the arms and legs. In some patients, the legs may be comparatively asymmetrical from birth. In such cases, leg aesthetics can be a solution.

BODY AESTHETICS

BREAST AESTHETICS

(Breast Augmentation, Breast Reduction, Mastopexy Gynecomastia)

Depending on the body structure of each woman, breasts also tend to have some differences. Breast augmentation is a plastic surgery operation to change the shape and size of the breast. For example, in some women, the breast size may be small for their body. Or, the desired size could not be achieved in the previous operation and a second operation may be needed. Some people, on the other hand, may prefer this operation to correct the size difference between their two breasts.
