FILLER APPLICATIONS

FOREHEAD FILLER

Although the changes seen in the skin with aging are widely accepted as a physiological process of the human body, the formation of lines on our skin, especially on our face, does not depend solely on aging. This can be said especially for wrinkles and lines in the forehead. In addition to physiological factors such as age, there are other factors that trigger the formation of forehead lines.

FILLER APPLICATIONS

CHEEK FILLERS

This procedure, known as cheek or cheekbone filler application, makes the cheeks fuller. It offers a practical and quick solution to aesthetic problems on the face. The hollowness of the eyes is reduced. It puts emphasis the nose, balances the forehead and chin protrusion and makes the face look younger.

FILLER APPLICATIONS

NOSE FILLER

It stands out as an effective method for removing deformities in the nose. It allows patients to achieve an aesthetic nose appearance painlessly and painlessly. Nasal filler allows correcting the distorted appearance in these areas by intervening in the nasal arch, nostrils and nasal tip without the need for a surgical intervention. The fact that the healing process after the procedure is fast is also effective in the frequent preference of this procedure.

FILLER APPLICATIONS

LIP FILLER

Lip filler application is the injection of dermal fillers to the inner part of the lips or around them to define the lips and make them fuller. Although there are various fillers used in lip augmentation, such as permanent/semi-synthetic or animal-derived fillers, the most reliable and widely used fillers are hyaluronic acid-based fillers.

FILLER APPLICATIONS

CHIN FILLER (JAWLINE)

In face esthetics, each region should be proportional. When the problems in the ratios of the chin are corrected, the results can be very impressive. With injections of fillers, a prominent jaw line can be provided, and the contours of your face and chin are significantly corrected and you can have an esthetic jaw structure.
