NON-SURGICAL FACELIFT

ENDOLIFT

Medical aesthetic applications that were developed alongside technological advancements, have emerged as alternative solutions in aiding the skin as it changes, gets saggy and wrinkled due to aging, environmental factors, and lifestyle. The most effective option among these alternative solutions is the FDA-approved Endolift application.

NON-SURGICAL FACELIFT

THREAD FACELIFT

Thread facelift treatments, which have become popular in the recent years among non-surgical facelift applications, continue to attract attention. Widely used worldwide, this method can also be applied to the face, neck and other regions of the body. Thread suspension is especially preferred for the correction of drooping cheek and chin appearances.

NON-SURGICAL FACELIFT

HIGH-INTENSITY FOCUSED ULTRASOUND (HI-FU)

The body part most affected by problems that arise over time is undoubtedly the face. Time, aging, gravity, genetics, lifestyle, dietary habits, and other environmental factors that adversely affect the skin can cause sagging and loosening in the skin of the face.
